Subject: Microsoft Settlement

Hi,

I'm from Switzerland, but you may be interested in our comments...

- 1st, we do not like Microsoft and their policy, those guys have NEVER invented anything, they just rub other company and pay in the court, but still make 90% of profit.
- 2nd, when they say that they invented something, it's because they bot the company who invented, if I have money, I can do the same
- 3rd, we think here in Europe, if MS get a monopole, which they have, this will be a very bad thing for any computer business, and in the futur for any business
- 4st, we don't know any MS products without bugs, security, etc...
So if MS still keep those monopole, nothing in the computer world can be protected against Hacker
- 5th, MS have never done anything for the Internet, just made it very difficult for the developer around the world, they want to impose the way to do, you can see many complain about this
- 6th, we think that all this is only a question of money, almost of the US Government is corrupt, if MS is here to day it's because they pay for it, only this, so if you want to give to anyone the same chance, STOP MicroSoft and their monopole, then we can think that the write Justice have been made
- 7th, you can see the last month that MS laugh about you and the justice, they made a new Game Machine (XBox), bot more that 10 company, try to get larger monopole by buying SGI licence (Microsoft Trying to Kill OpenGL, Microsoft has aquired key 3D patents from SGI), etc... etc...
- 8th, there is not one day without you can read that MS is going to court for seeking damages... "an attempt to get justice." from those company, you should think about this... (only bad people go's to court every day), so what you waiting for ???
- 9th, if you do not stop MS today, the future of the world will be very bad, MS will have more power as any government in this world
- 10th, etc... etc... we can talk about this day's

- 11th, please fix Micro\$oft

Best regards

David

PS: sorry for my bad English
